Presidency University, Bengaluru
Data Science

2023 - 2026

CGPA - 7.14

Intermediate (Class 12)

NRI Junior College
Mathematics, Physics, chemistry

2021 - 2023

60%

Secondary school Certificate (class 10)

Sri Kakatiya High School
General

2019 - 2020

100%

PROFESSIONAL EXPERIENCE (PROJECTS)

Task Management System

Jan 2025 - May 2025

- Developed a responsive Task Management System to organize daily tasks.
- Implemented Create, Read, Update, and Delete (CRUD) functionality.
- Added task status management and user-friendly navigation.
- Used Local Storage to save tasks and retain data after page refresh.
- Designed a clean and responsive interface for a better user experience.

ElectroMart - AI-Powered E-Commerce Support System

Jan 2026 - May 2026

- Developed a responsive AI-powered e-commerce web application for electronic products using Next.js, React.js, TypeScript, JavaScript, HTML5, CSS, and Tailwind CSS.
- The application enables users to browse products, search and filter by category, view detailed product information, manage a shopping cart, and complete the checkout process.
- Built an AI Product Assistant with text-based FAQs and voice support to help customers with product queries.
- Designed and implemented an Admin Dashboard with secure login and product management (Add/Delete Products). Used Local Storage for data persistence.
- The project follows a modern component-based architecture and responsive design principles, providing a scalable foundation for future integration with databases, authentication, and online payment systems.
